

Neurology

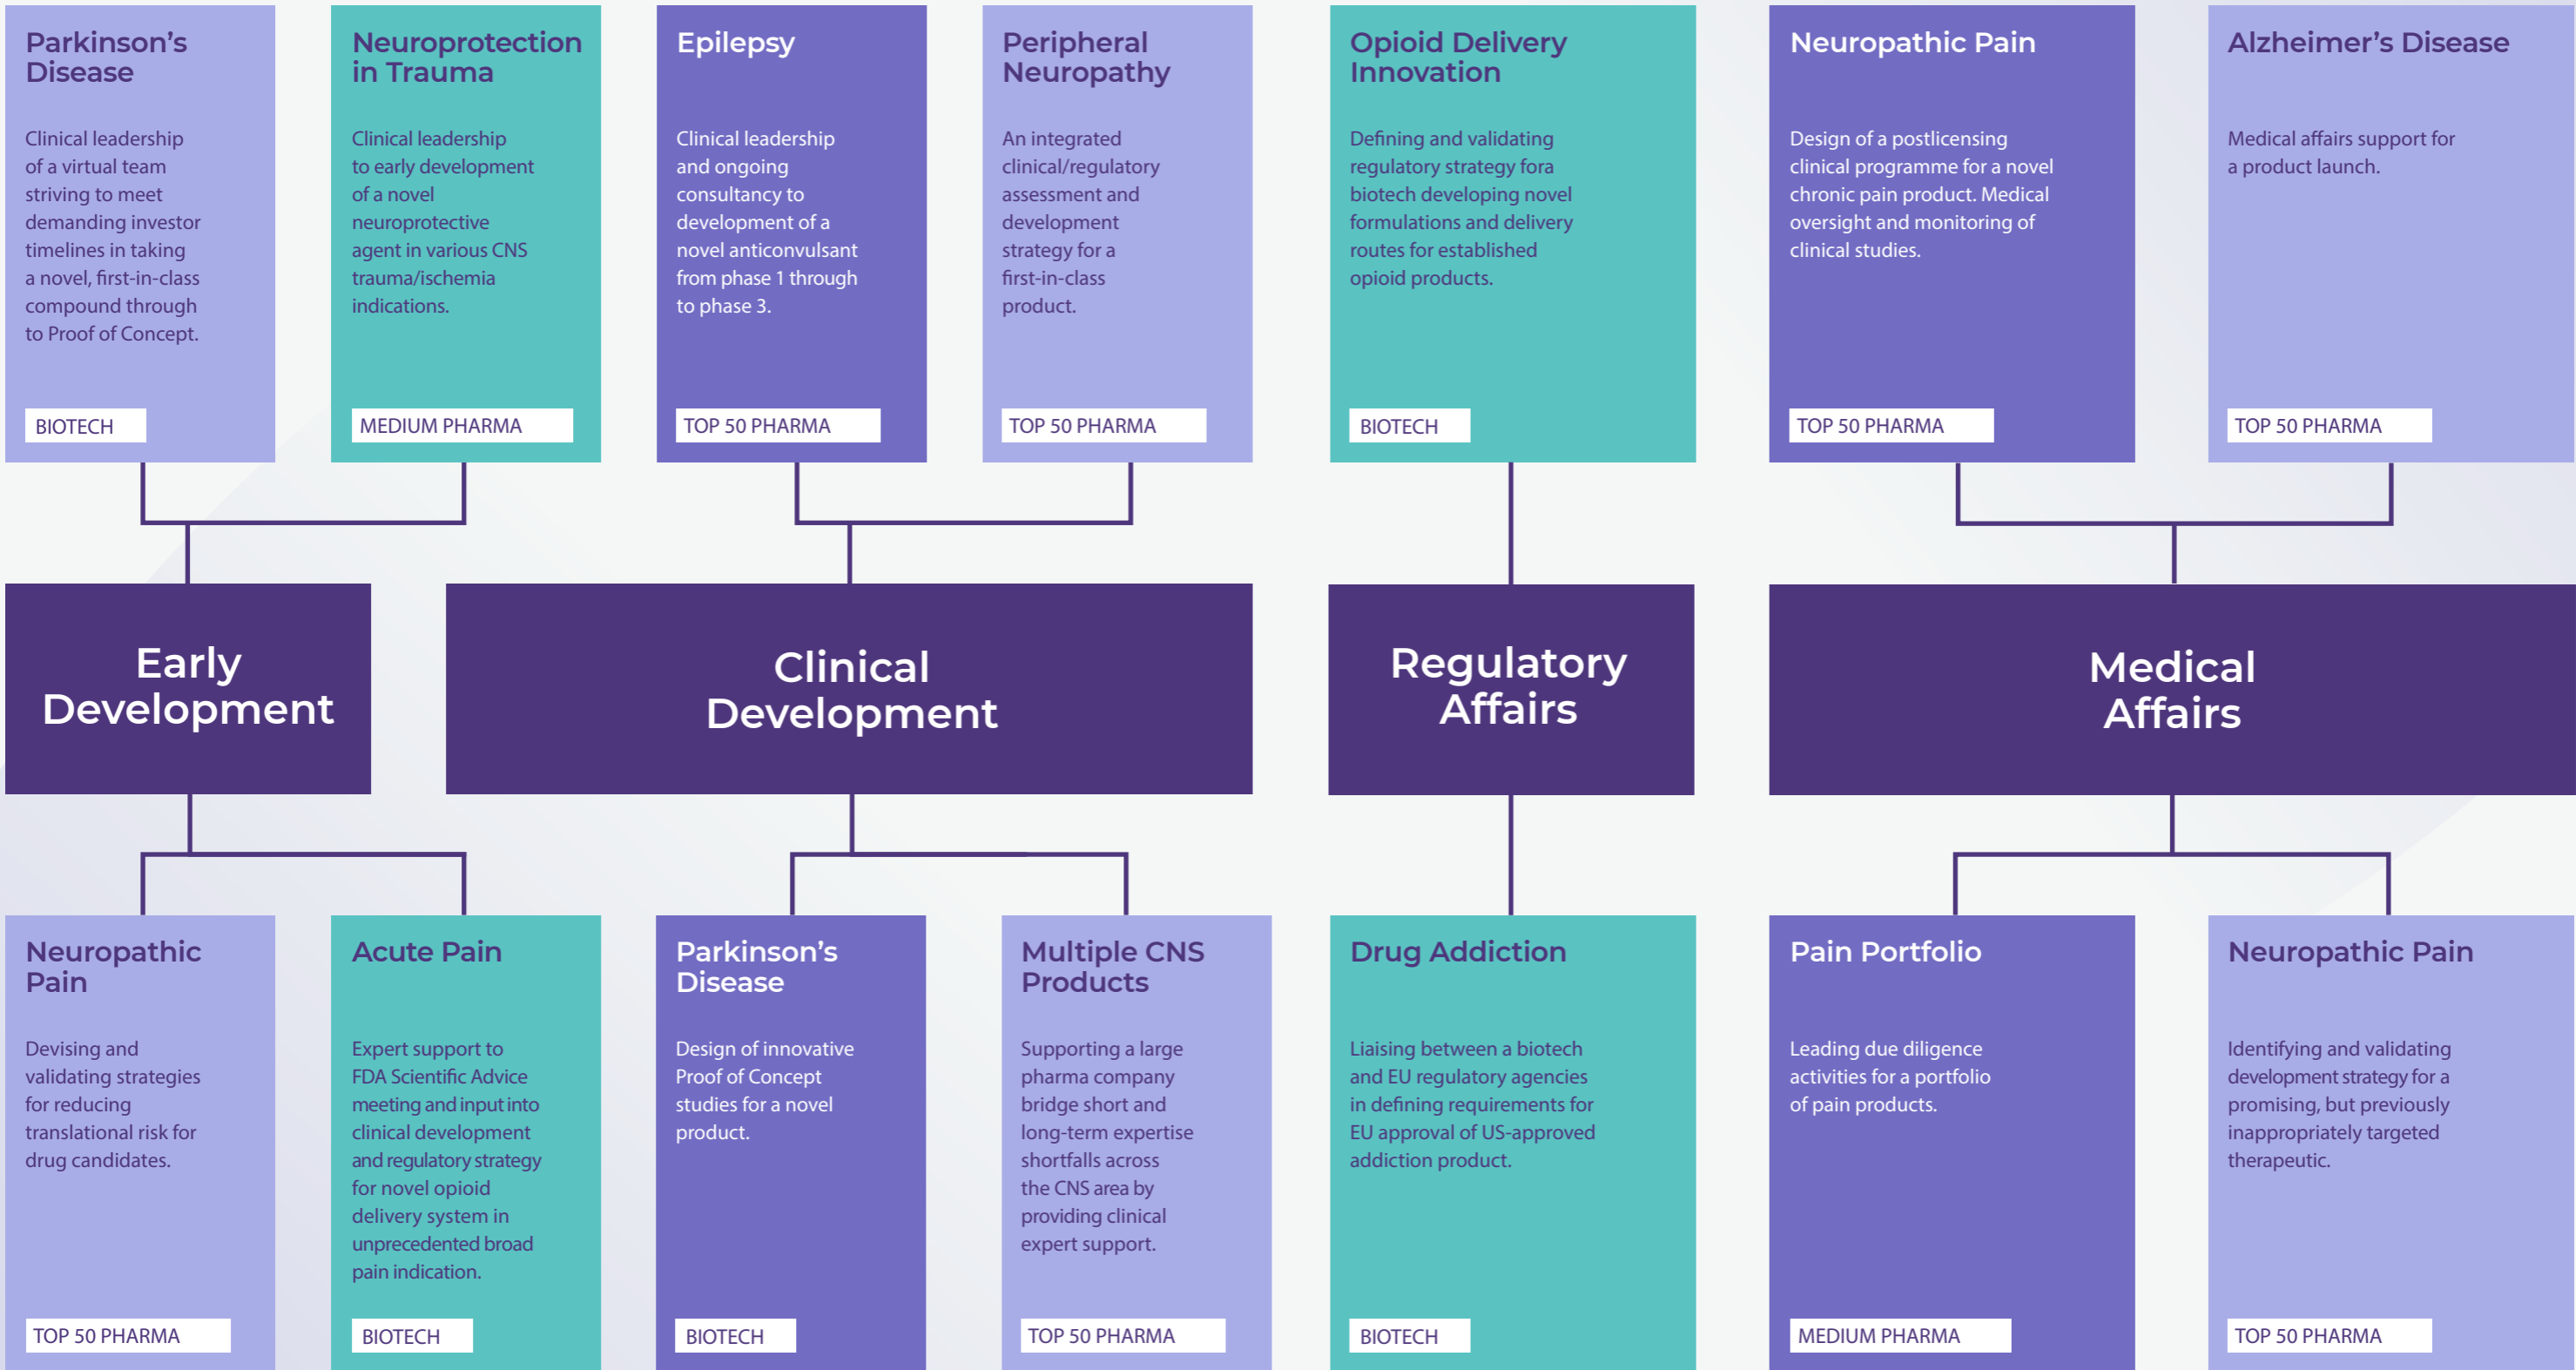

The growing burden of many neurological conditions such as Alzheimer's or Parkinson's disease, multiple sclerosis and chronic pain threatens to overwhelm healthcare resources. While there are many opportunities for new neurological therapeutics, the connections between target and neurological diseases are only slowly being elucidated. tranScrip's expertise and capabilities in neurology extend across a wide range of indications such as epilepsy, neurodegenerative diseases, stroke, sleep disorders, depression, schizophrenia, ADHD and pain. We cover all phases of the product lifecycle and support and guide our clients to meet their targets even if this means challenging the current clinical and regulatory paradigms.

Diverse Programmes Effective Execution

A snapshot of our recent projects

tranScrip is a highly specialist pharmaceutical consultancy providing strategic expertise, therapeutic experience and operational excellence across the entire product lifecycle.

We build product strategies as well as design and execute development programmes and commercialisation activities.

Our experienced physicians and scientists, together with our regulatory, clinical and commercial experts, offer truly flexible bespoke solutions and support to maximise the value of products.

We help to expedite the development and commercialisation of products for the benefit of patients worldwide.
